Q1 Check positive number:

```
class Positive {  
    public static void main(String args[])  
    {  
        int num = 1;  
        if (num >= 0)  
            System.out.println("Positive")  
        }  
    }  
}
```

Output: -

Positive

Q2 Check negative number:

```
class Negative {  
    public static void main(String[] args)  
    {  
        int num = -1;  
        if (num <= 0)  
            System.out.println("Negative")  
        }  
    }  
}
```

Output: -

Negative

Q3 check odd even

```

class Odd even {
    public static void main(String [] args)
    {
        int num=4;
        if (num % 2 == 0)
        {
            System.out.println("Even");
        }
        else
        {
            System.out.println("odd");
        }
    }
}

```

Output

Even

Q4 check Good Morning msg based on time

```

class Good morning {
    public static void main(String [] args) {
        int hour = 6;
        if (hour >= 5 && hour <= 12) {
            System.out.println("Good morning");
        }
    }
}

```

Output: ~
Good Morning

Q5 Area of square

```
class Square {  
    int side = 4;  
    public static void main(String[] args)  
    {  
        int side = 4;  
        int area = 0;  
        int area = side * side;  
        System.out.println("Area of  
square = " + area);  
    }  
}
```

Output

Area of square = 16

Q6 Area of rectangle

```
class Rectangle {  
    public static void main (String[] args)  
    {  
        int Length = 10;  
        int Breath = 5;  
        int area = Length * Breath;  
        System.out.println("Area" + area);  
    }  
}
```

Output

Area = 50
